

THE GLEICHEN CALL

VOLUME 46 NO 29

Published as second class mail, GLEICHEN, ALBERTA, WEDNESDAY

SEPTEMBER 30, 1953 SUBSCRIPTION \$2.00 PER YEAR

Regular Meeting Town Council

The regular town council meeting for September was held recently with Mayor Colpoys in the chair and Councilors U. A. Jones, Walter Pettit, E. Bolinger and R. K. Hunter present.

The minutes of the previous meeting were read and on the motion of Councilor Bolinger adopted.

It was decided that the money received from the insurance company on the old burned risk be turned over to the Chamber of Commerce to be applied on the erection of a new rink.

The matter of purchasing chairs for the council chamber was left over to the 1954 budget.

The connecting of the ground reservoir to the water system was left to the water committee.

R. C. Clifford and A. Plante made applications for water connections and the town engineer will attend to the matter.

The council decided to order sufficient steel culvert for the road by T. Haskett's and sufficient wooden culvert for the lane back of Gleichen Implements.

It was agreed that the flooring tank out of the new fire hall may be used by the rink building committee provided it is used for flooring.

The auditors report for June 30th was accepted and filed. The report of the R.C.M.P. was accepted. The secretary's statements for July and August were accepted and referred to the public works committee.

The application of Elmer Crum for water to the mill was accepted. Mr. Haskett's complaint No. 10 was accepted and was presented and referred to the public works committee.

The application of Dr. G. H. Parquharson to repair his building in Block 4 was referred to the real estate committee with authority to accept or reject.

The secretary was instructed to write to C.C. Chidlow and ask him to bring four lengths of fire hose the next time he comes to Gleichen for inspection by the fire department, 2 1/2 inch threads to the inch.

All accounts were referred to the finance committee and if found correct be paid.

Fire Prevention Week Oct. 4-10

Alberta cities and towns, as well as industrial plants will be eligible to win the 1953 Fire Prevention Week Contest of American National Fire Protection Association.

Entry blanks for the contest have been distributed to all Alberta municipalities and industries so that effective programs for Fire Prevention Week, October 4-10, may be organized.

The contest is judged on the extent of the organization of a Fire Prevention Week program in his municipality or industry as well as the effectiveness of his year-round fire prevention activities. Entrants are asked to create a new slogan for the 1954 Fire Prevention Week as well. This year's slogan is "Fire Preeds on Careless Deeds".

Alberta cities and towns can compete in six population classes with first 10 winners and a Grand Award winner for Canada chosen from all entries regardless of population. Industrial entries compete with plants in all parts of Canada and the U.S. All Alberta entries in the contest should be submitted to the Provincial Fire Commissioner, Natural Resources Building, Edmonton.

RADIOACTIVE BUGS

Entomologists are planning new tests for radioactive insects and insecticides to find out how far and how fast insects fly, how insecticides kill insects and how some insects develop resistance to certain insecticides.

Since insects themselves do great damage and often carry diseases of man, plants and animals, the knowledge of how far they travel in a known time will help entomologists to devise more efficient methods of control.

An insect tagged with a radioactive element can be detected by a counting mechanism even when it is out of sight, such as the stem of a tree or inside the stem of a plant. Similarly, a tagged insecticide can be traced into an insect's body in a few minutes.

These tests are being conducted by the U.S. Atomic Energy Commission. The results of the insecticide tests will be published in the near future.

CPR Had First Domes

A long forgotten gem in the Canadian Pacific Railway's motive power and rolling stock department came up with an unusual view of this country's scenery at the turn of the 20th century that blossomed into an additional passenger revenue for rail lines throughout the continent.

It was the first "dome" car to be used on railway lines and was designed to give passengers a bird's eye view of Canada's spectacular Rocky Mountain scenery.

Today the idea has spread throughout the world, particularly in the United States where railway dome cars are a feature of several lines.

A recent \$28,000,000 order for 150 new stainless steel cars, the C.P.R. included 30 similar cars.

Long forgotten gems, such as the one shown above in top picture, which was used to travel on an unattended view of this country's scenery from coast to coast. The cars will be placed in service on transcontinental trains and will have a dome on top of the car.

Although the design of the dome prototype, shown in bottom picture above, remains unknown, the C.P.R. has a first transcontinental view line, a head start in railway design. In July, 1902, the world's first dome car rolled out of the shops and into service.

In it, railway passengers could sit in revolving parlor car chairs or reversible seats and have a view of Canada's scenery.

The car proved an immediate hit and three others, with modified improvements, were put into service. But the C.P.R.'s unknown designer and constructor died.

Air conditioning and Polaroid glass were unknown and the sun's ultra-violet rays proved unacceptably warm. The cars were replaced with open-air observation cars several years later.

The railway reverted back to its original idea recently when it ordered the 36 dome cars—more than 50 years after it first had them on the road.

Canada's scenery is hard to beat in any corner of the land, a railway official said. "We admire the Rocky Mountain area is the most spectacular, but we believe the cars can be used to advantage from coast to coast."

Under the auspices of the Gleichen Chamber of Commerce the local Gun Club staged a shot Sunday afternoon and was well attended. There were entries from all over the district and a large number from the various Gun Clubs in Calgary. After all expenses were paid the Chamber of Commerce found it had the 15th year of \$856 to its credit.

At the present time the Chamber of Commerce has on hand the sum of \$3,011.70 for the new rink. The Blackfoot Indians have promised a donation of \$1,000. Anyone who has not yet donated towards the new rink may do so at the Town Office. A car of lumber is on the way for the building and help is urgently needed at the rink, before the lumber arrives to clear away the rubbish and level the ground inside the foundation for the rink.

All interested are requested to arrange to give some time to this work.

A movement to reduce the size and height of the more awkward and dangerous trailers passing over the crowded highways is a project worthy of the immediate attention of the International Safety Council. Some of the hotel sized trailers now swaying menacingly along the roads in Canada are working a great hardship on the largest part of the traffic and continuously threatening life and property. It would seem that many of the families would be better to remain at home than to hit the road with bungalow-sized accommodation dangerously reducing the safety and efficiency of the family car. Unfortunately the biggest trailers on any tour in Canada and the United States are usually met on the narrowest and least passable stretches of highway.

Along dusty roads the big trailer works its greatest ravages on safety and comfort.

If producers and the consumers of farm products were free to meet together on our own soil and to bargain freely with each other they would soon agree on prices that would allow the surplus products to pass into consumption and world trade would be resumed.

Canada is the world's leading trading nation on a per capita basis.

Why Gamble on Prices Next Spring?

PLACE YOUR ORDER FOR MARVELUBE OIL AND GREASE NOW!

IT PRICES RISE BETWEEN NOW AND NEXT SPRING YOU PAY TODAY'S PRICE

WE PRICES FALL YOU PAY ON THE BASIS OF THE LOWER PRICES

This is an offer we've been making year after year and more and more farmers are finding it pays. The offer is open until Dec. 31st. Nothing to pay down—pay only on delivery sometime between Feb. 1st and April 30th. If prices rise between now and spring delivery you pay today's price. If prices drop between now and spring delivery you pay on the basis of the lower price. No matter what way you look at it you have everything to gain and nothing to lose. Don't delay. Place your order now!

Alkali Patches And How To Treat Them

One of the most insidious problems with which a large number of the farmers of southwestern Alberta are faced is the increasing severity of alkali patches in cultivated fields. Experiments at the Experimental Farms indicate that both chemical fertilizers and baryard manure give relatively higher response on these slightly saline patches than they do on the more fertile portions of the field. While these treatments are beneficial, they do not constitute a cure and it is probable that many of these areas will become worse in the future.

The fundamental cause of the accumulation of these alkali salts at the surface of the soil, is the evaporation of salt-laden waters. The salts are dissolved in the water as it passes through the soil and are re-deposited at the surface when the moisture evaporates.

The use of forage crops in rotation with cereal crops can do much to reduce the hazard of salinity because forage crops assure that all water entering the soil is used. A two- or three-year rotation of fallow and cereal grains does not always assure this during moist years.

Forage mixtures help to prevent runoff and the occurrence of local ponding which is the source of these salt-laden waters. Increasing the organic matter content of the soil by the use of forage mixtures also increases the water-holding capacity of the soil and thus tends to prevent the movement of excess salt-laden water through the soil.

Warn Farmers Wild Animals Have Rabies

DRUMHELLER, Alta.—Farmers and ranchers in the Drumheller district have been warned that a skunk and porcupine—unless they have since died of rabies infected by a fox—are still loose in the area and a menace to livestock and other domestic animals.

The fox was beaten to death with an iron bar by Joe Smith, a resident of three miles north of Beynon after the animal attacked a large dog. The dog apparently escaped rabies infection.

Confirmation that the fox was rabid was received here. District agriculturalist S. Pottier said he has warned farmers and ranchers to be on the alert for other rabies-infected animals in the area. He said indications are that the fox had fought a skunk and porcupine before being killed.

Bougainvillea, the climbing shrub of the four o'clock family, is a native of South America.

Win Holiday Cash!

ENTER BLUE BONNET'S \$10,000 CONTEST

Go where you want... when you want... this year! Over \$10,000 worth of cash, Northern Electric, "Sportman" portable radios, and Melburn "Count" Aeropack baggers, will be awarded to winners during this sensational contest! All you do is write your name in the Blue Bonnet Magazine line, in 25 words or less. Send your entry to Blue Bonnet Magazine, 1125 Broadway, New York 10, N.Y. (with Good Housekeeping Seal of Approval). For full details, packages of facsimiles, to Blue Bonnet, Inc., Happy Holiday Contest, P.O. Box 1180, New York 10, N.Y. Send your name and address, and your good luck. Complete contest rules at your grocer's.

WHAT OTHER PAPERS ARE SAYING:

William Boby, Foam Lake farmer made a good paying round on his field recently, while using the oneway... he turned up the wallet he lost while harvesting last fall. The hundred dollars and papers the wallet contained were not turned in until six months stay under the snow.—The Western Review, Foam Lake, Saskatchewan.

THE LITTLE TOWN
like to live in a little town, where the trees meet over the street.
Where you wave your hand and say, "Hello."
To everyone you meet.

I like to pause for a minute, Outside the grocery store, And hear the friendly gossip Of the folks that live next door.

Our lives are intermingled, And we feel their joys and sorrows, And as we daily come and go, Yes, I like to live in a little town, And I care no more to roam, For every house in that little town Is more than a house; it's a home.

—The Western Review, Riverhurst, Sask.

Patterns Iron-On Designs In 3 Colors

7119

by Alice Burdick

Garden-ful of roses! 12 luscious motifs in two sparkling shades of red, one green—fresh as if you just picked them! No embroidery, simply iron on sheets, pillowcases, towels, napkins—any have the beautiful, expensive-looking linen you've dreamed of!

—Washable! Easy! Iron on! Pattern 7119 includes 12 transfers from 1x11 to 4x11 inches.

To obtain this pattern send twenty-five cents in coins (stamps cannot be used).

Household Arts Department, Prairie Publishers Limited, 80 Front Street W., Toronto. Be sure to write plainly your Name, Address and Full Name in Block Letters. **TEN COMPLETE PATTERNS** to sew, embroider, crochet—printed in color. New 1953 Alice Burdick Needlecraft Book! Plus many more patterns to send for—hundreds of ideas for gifts, home accessories, toys, fashions! Send 25 cents now!

TRAVELLING PEACOCKS
MOOSE JAW, SASK.—Peacocks obtained for the wild animal park here from Texas got as far as the Canadian border where it was found they were not accompanied by a veterinary certificate. So the birds were shipped back to get certificates, allowing officials here more time to improve the peacock pen.

SNOWY SPOT
Annual snowfall in Oregon's Crater Lake national park ranges between 50 and 60 feet.

Funny and Otherwise

"Ladies and gentlemen," shouted the street performer, "in a few moments I will astonish you by eating coal, stones and nails. I will also swallow a sword, then I will come around with a hat, trusting to get enough for a crust of bread."

"What?" came a voice from the crowd. "Still hungry?"

Rastus had just been presented by his wife with his twelfth child. As the proud father was escorting the doctor to the door a duck passed by.

"That duck is that?" asked the doctor.

"Dad ain't no duck," said Rastus, with a sigh. "Dad's the clerk with its legs worn out."

"Johnson says I wears the trousers in his house."

"Perhaps so, but every night after supper he wears an apron over them."

Old lady handing tuppence to tramp: "It's not that I think you deserve it, but they give the pleasure it in giving."

Tramp: "Make it a five, ma'am, 'cause they give you yourself."

A young man and his girl were riding out in the country on horseback. As they stopped, for a rest, the two horses rubbed noses affectionately.

"Ah, me," said the young man, "that is what I'd like to do." "Well, go ahead," said the girl, "it's your horse."

"It is a positive delight to meet a man you feel you can trust," remarked the individual with the high forehead.

"Oh, I don't know. I prefer a man who pays cash," replied the man who kept the grocery shop.

An estate agent bought his little girl a beautifully furnished doll's house, and on his return after a week's absence asked her how she liked it.

"Oh, it's very nice, Daddy," she replied.

"But where is it, Betty?"

"Oh, I rented it furnished to Cousin Jill for a quarter a week."

Dinah, having trouble with an ulcerated tooth for some time before she got up enough courage to see a dentist. The moment he touched her tooth she screamed at the top of her lungs.

"What are you moaning such a racket for?" demanded the doctor. "Don't you know that I'm a painless dentist?"

"Well, ah," retorted Dinah, "my eye is painless, but ah, isn't."

Close to 2,200,000 paper napkins are made in Canada each year.

SAVING A LIFE....

BY ARTIFICIAL RESPIRATION BACK PRESSURE-ARM LIFT METHOD

EACH year many people are the victims of asphyxia. A few are saved because of the prompt action of some bystander. Asphyxia need not always be fatal and in an effort to save lives the Canadian Red Cross Society, First Aid-Swimming and Water Safety Service, has supplied the following information in regard to the newly adopted method of artificial respiration.

If breathing stops because of electrocution, drowning, asphyxia, poisoning, gas poisoning, suffocation, or polio-myelitis, start artificial respiration immediately. Do not delay—see to it as soon as possible, send someone for a physician. Have other helpers wrap victim in blankets, apply artificial warmth, remove wet clothing and act as relief operators. The standard technique for the Back Pressure-Arm Lift method is as follows:

Position of the Subject:

Place the subject in the face-down position. Bend the elbows and place the hands one upon the other. Turn his face to one side, placing the cheek upon his hand.

Position of the Operator:

Kneel on either the right or left knee at the head of the subject, facing him. Place your arms at the sides of the subject's head, close to the forehead. Place the opposite foot near the elbow. If it is more comfortable, kneel on both knees, one on either side of the subject's head. Place your hands upon the flat of the subject's back in such a way that the heels lie just below a line running between the armpits. With the tips of the thumbs just touching, touch the fingers downward and outward.

Compression Phase—3 seconds:

Rock forward until the arms are approximately vertical and allow the weight of the upper part of your body to exert alone, steady even pressure downward upon the hands. This forces air out of the lungs. Your elbows should be kept straight and the pressure exerted almost directly downward on the back. Forty pounds pressure is more than adequate for a normal adult and this pressure should be exerted downward for small people and children.

Expansion Phase—3 seconds:

Release the pressure, avoiding a fast thrust, and commence to rock slowly backward. Grasp the subject's arms just above his elbows and draw his arms upward and toward you. Apply just enough lift to feel resistance and tension at the subject's shoulders. Do not bend your elbows, and as you rock backward the subject's arms will be drawn toward you. Then lower the arms to the ground. This completes the full cycle. The arm lifts expands the chest by pulling on the chest muscles, arching the back, and relieving the weight on the chest. To maintain a steady, even rhythm the operator should apply pressure for 3 seconds then lift the arms for 2 seconds. Correct timing can be secured as follows: . . . Apply pressure through counts One Thousand and One One Thousand and Two—then start lifting

victim's arms on One Thousand and Three (and through count) One Thousand and Four, on count One Thousand and Five lower victim's arms and place hands at his back ready for another pressure. The cycle should be repeated 12 times per minute at a steady uniform rate. The compression and expansion phases should occupy about equal time, the changing periods being of minimum duration.

Additional related directions. It is all-important that artificial respiration, when needed, be started quickly. There should be a slight inclination of the body, if possible, in such way that fluid drains better from the respiratory passage. The head of the subject should be extended, not flexed forward, and the chin should not sag but be held up. The head of the subject should be extended, not flexed forward, and the chin should not sag but be held up. The head of the subject should be extended, not flexed forward, and the chin should not sag but be held up. The head of the subject should be extended, not flexed forward, and the chin should not sag but be held up.

There have been some remarkable recoveries achieved but all too frequently artificial respiration is discontinued after only a short period of application. To guide those who may be called upon to apply this first aid measure, three rules should be remembered. Continue with artificial respiration until the victim breathes of his own accord, or until physician declares life extinct, or (if no physician is available) until rigor mortis sets in. (The stiffening of the body, first noted in the joints of the arms and legs.)

Those individuals who have been taught the Schafer method should have little difficulty in learning the Back Pressure-Arm Lift method. The Schafer method is still satisfactory and is more adaptable under certain circumstances. Further information on these two methods may be secured from the Canadian Red Cross Society.

—By Chuck Thurston

Water Cooler BIBLE INSTITUTE

As a mid-Direction school in the Bible Institute of America, we have been teaching Bible for over 20 years. We have a full-time Bible teacher, and a full-time Bible teacher. We have a full-time Bible teacher, and a full-time Bible teacher. We have a full-time Bible teacher, and a full-time Bible teacher.

3 different Cheese-flavored Treats from One Basic Dough!

Clever one-oven tricks with FLEISCHMANN'S YEAST!

One dough—no oven—three kinds of flavor-luscious baking! It's easy to be a wit when you start with Fleischmann's Fast Rising Yeast. Baking so sure, so fast—results so light and appetizing! You bake at home, let us save you the pleasure of Fleischmann's on hand.

BASIC CHEESE DOUGH

Sift in 1½ cups unseasoned bread flour and 1½ cups lightly-sifted shredded cheddar cheese.
Mix in 1½ cups milk, 1½ cups unseasoned bread flour and 1½ cups lightly-sifted shredded cheddar cheese.
Turn out on lightly-floured board and knead dough lightly with smooth and elastic. Place in a greased bowl and grease top with dough. Cover and set dough in warm place, free from drafts, and let rise well doubled in bulk. Turn out dough on lightly-floured board and knead dough lightly with smooth and elastic. Place in a greased bowl and grease top with dough. Cover and set dough in warm place, free from drafts, and let rise well doubled in bulk. Turn out dough on lightly-floured board and knead dough lightly with smooth and elastic. Place in a greased bowl and grease top with dough. Cover and set dough in warm place, free from drafts, and let rise well doubled in bulk.

1. CHEESE LOAF

Roll out a batch of dough into a loaf and set into a greased loaf pan about 4½ by 8½ inches. Grease top. Cover and let rise well doubled in bulk. Bake in a moderate oven, 375°, about 40 minutes—cover loosely with paper towel during last part of baking to avoid crust becoming too brown.

2. MARMALADE BRAN

Roll out a quarter of a batch of dough into an 8 inch square on a lightly-floured board, loosen dough. Spread with ¼ cup marmalade and sprinkle with ¼ cup chopped nuts. Roll up jelly-roll fashion, and shape and bake. Roll out an adding 9 inches long and 3 inches wide, loose dough.

3. CHEESE BRAD STICKS

Cut a quarter of a batch of dough into 12 equal round pieces and roll out to a size, line also into about 7 inches long. Brush sides with water and roll lightly in crumbs. Place well apart, on greased cookie sheet. Cover and let rise well doubled in bulk. Bake in a moderate hot oven, 375°, about 15 minutes.

My MAGIC pastry rates cheers!

MAGIC CHICKEN TURNOVERS

Combine and chill 1½ c. finely-diced cooked chicken, 1 c. cream-style white sauce, 1½ c. salt into bowl. 2 c. onion-chopped parsley (or 1½ c. onion-chopped white onion). 2 tbs. Magic Baking Powder, ½ tsp. salt, 1 tbs. granulated sugar. Cut in finely 1½ c. shortening, 1 beaten egg and ½ c. milk. Make a well in dry ingredients, pour in liquid and mix lightly with a fork. Roll dough out to ¼" thickness; cut into 4 squares. Place about 2 tbs. chicken mixture on each square, near corner. Fold dough over diagonally, making triangles, seal edges by pressing with fork tines; prick tops. Bake on greased pan for 10 min. over 400°, 15 min. or until golden brown.

FEGGY

SOB

OUR COMPLETE SHORT STORY

DEEP WITHIN MY HEART

By LEIGH HAYDEN

MAUD HAWKINS lifted one of the apples from the pan and smelled it. "Heavens!" It took her back to childhood, the happiness of which, in memory, was more real to her than the tragedy of her married life. She smiled as she thought of her boarders—and of what her friends would say if they knew she was a grocer, a widower—the home-loving wife, an Ann, a stenographer. There was all Maud knew about Ann—but what a pair they'd make! Good-looking! Steve tall, dark, always smiling. Ann, blue-eyed and blonde. But Steve wasted his time at the hotel, following Maud around, helping her in the garden, when he might be getting acquainted with Ann.

Maud sliced the apple into the lower crust, covered them with sugar and cinnamon, put the top crust on, and popped the pie into the oven. Time to start dinner!

As she pushed a lock of brown hair off her forehead, a thought struck her. She felt in her apron pocket. No, it wasn't there! What had she done with it? She was in Steve's room during when the idea for the greeting card came to her, and she sat on his bed to write it down. And then the "phone had rung! Maybe she could remember it. She'd like to get it and some others in the mail to a greeting card company. Fifty cents a line, added up to quite a bit! How did it go?

"To My Secret Love,
"Deep within my heart I hide
Dreams of you right by my side.
Won't you, by some wondrous sign,
Let me know that you'll be mine?"
That was it.
